

Crime Reporting System

Project Planning

1. Signup/Sign in :

The signup and sign in pages will be accessible from the same landing page, which will prompt the users to enter their login credentials or create a new account for user verification.

The format will be similar to Instagram login page for PCs, with the login/signup forms on the right side and a catchy image and maybe some info on the left.

Note:

- The user must set up his/her profile and verify the credentials before they can be registered.

2. Home :

The home page will consist of a dynamic hero section, displaying the different rules and safety measures to the users.

On the top will be the banner and on the bottom the footer; these two elements will be repeated on all pages.

The main content area of the homepage will be the user/admin dashboard.

The left side of the page will consist of a minimizable navigation bar.

3. Contact Us :

A simple contact page where you can contact your local authorities.

4. Pending Cases :

In a list or table with view option on the right.

- **User :**

The users pending cases page will only consist of static content of pending cases .No changes will be possible.

- **Admin :**

The admin account has customized version allowing full control to delete pending cases.

➔ With delete option on the right.

5. Report A Crime:

Single page with multiple <option> tags for getting user info. : instead of creating separate static pages with single forms for every crime, just create a single page where you can choose the crime type, enter and validate your basic credentials ,crime description and upload any evidence. Finally submit and get contacted by officials.

NOTE: No changes will be possible after submitting a report. For any changes, a new report must be filed and the previous requested for deletion. Request to be made to admin.

Each Crime Report will automatically generate its document which can be viewed from admin side when required.

6. **Account Settings :**

Account settings like change password or personal details such as location info etc.

Additional pages for Admins only

7. **Ongoing Investigations :**

Shows the ongoing investigations, with progress details.

8. **Closed Cases :**

Shows the closed cases with complete details.
